

Cora-Caine[®] Relieving Adhesive Ointment

Cora-Caine is a pain-relieving dental analgesic adhesive ointment for new or intermediate dentures. The active ingredient is Benzocaine 16%. Cora-Caine provides immediate relief and a secure fit by soothing tender ridges and relieving the discomfort of sore spots. Acting as a gel-like cushion between the denture and the tissue, Cora-Caine is applied directly onto the denture to provide positive retention and enhance stability.

- 16% Benzocaine
- Effective up to 24 hours
- Pink in color
- Perfect product for denture break-in period
- No smell or aftertaste
- Box comes with 36 tubes

#16621 36/4g TUBES

Pressure Indicating Paste (PIP)

Pressure Indicating Paste (PIP) is a pure white silicone paste, used for seating crowns, bridges and full, immediate and partial dentures. The brief procedure yields specific results that are easy to read and thoroughly reliable, surpassing results obtained with chemical set pressure indicating materials used to locate areas of denture discomfort. PIP is applied to the dry denture; companion PIP spray is applied to the tissue. The denture is then seated under pressure then removed. Areas where the paste has been displaced show points of excessive pressure.

- #6120900 1 oz. Tube
- #6120200 1 1/4 oz. PIP Jar with Remover
- #6120300 2 1/4 oz. PIP Jar with Remover
