*****FOR IMMEDIATE RELEASE*****

NEW FRANKEN, WI – January 23, 2018

Dental Health Products, Inc. (DHPI) announces new partnership with VidaShield™.

VidaShield™ was developed through a partnership between Ushio America, Inc. and American Green Technology (AGT), with the goal of improving patient care and indoor air quality through fast, 24/7 UV-C air purification.

The synergy between AGT's expertise in lighting fixtures and air purification system manufacturing and Ushio's expertise in Germicidal UV, Scientific and Medical light sources created the innovative VidaShield™ system. VidaShield™ reduces the levels of bacteria and fungi in treated air and reduces the settling of viable bacteria and fungi on surfaces. This unobtrusive, active UV-C air treatment system operates 24/7 in occupied spaces.

“VidaShield™ was founded on the principal of doing what is right for patients and healthcare workers around the globe. We serve all customers with a sense of urgency, respect and excellence. Our philosophy of constant and never-ending improvement will continue with your input. Our focus is providing the healthcare sector with a healthier environment through better air, while under-promising and over-delivering to you, our customer. We appreciate our relationship and look forward to serving you because everyone deserves healthy air!”

– Daniel Bogar, CEO
